SkyTel Fair Usage Policy

How unlimited calling and high-speed data are managed

Purpose

The fair usage policy keeps the network reliable for every customer. It describes what unlimited calling means, how data allowances behave, and what happens if a number is used in ways the plans are not designed for.

Unlimited calling

Unlimited calling is for personal, non-commercial use and is subject to network security controls. Examples of use that is not personal include running a call centre, automatic dialling, reselling minutes and operating SIM boxes.

Data allowances

- Daily data allowances are high-speed allowances.
- After the included allowance is used, speed is reduced to up to 64 kbps until the next reset.
- Prepaid daily data resets at midnight. Postpaid data resets when the next bill cycle begins.
- Hotspot use counts toward the included data allowance.
- A Daily Data Pack adds 1 GB of high-speed data for one day.

Network management

SkyTel may manage traffic during congestion to maintain service for all customers. Traffic management applies equally to all customers on the same plan and does not target any individual service.

Activities that are not allowed

- Using a personal plan for commercial calling or messaging services.
- Reselling data, minutes or SMS.
- Automatic or bulk dialling and unsolicited bulk SMS.
- Using equipment that bypasses network controls, such as SIM boxes.

What happens if the policy is breached

1. SkyTel sends a warning message to the number.
2. If the activity continues, services on the number can be restricted for a period.
3. In serious or repeated cases the connection can be suspended.

If you believe a restriction was applied by mistake, contact SkyTel support at 1800-000-0000 and share your number and the date you noticed the problem.

Frequently asked questions

Q: Why did my internet become slow after some hours?

A: The daily high-speed allowance may be used up. Speed is reduced to up to 64 kbps until midnight.

Q: Does hotspot use count toward my data?

A: Yes. Hotspot use counts toward the included data allowance.

Q: Can I use my plan for my business calls?

A: Unlimited calling is for personal, non-commercial use. Heavy commercial calling is not covered.
