SkyTel SIM Services Guide

Activation, recharge, deactivation, lost SIM, porting and eSIM

Activating a new SIM

To activate a new SIM, complete identity verification at a SkyTel store or through the official verification flow. Service starts after verification is complete.

- Documents accepted: a government photo ID and an address proof.
- Keep the original documents with you when you visit a store.
- Activation usually completes within a few hours of successful verification.

Ways to recharge your SkyTel number

- SkyTel app: choose Recharge, pick a plan or enter an amount, and pay with UPI, card or net banking.
- SkyTel website: the same options as the app.
- USSD: dial *123# and follow the menu.
- In person: visit any SkyTel store or authorised retailer.

Balance and plan benefits are updated within a few minutes. If a recharge fails but money was deducted, the amount is refunded to the original payment method within the period given in the refund policy.

Deactivating a SIM

To deactivate a SIM, contact SkyTel support and complete identity verification. Online assistants can explain the process but cannot submit a request or change your service.

1. Call SkyTel support at 1800-000-0000.
2. Complete identity verification.
3. Confirm the number you want to deactivate.
4. Pay any outstanding postpaid dues, if applicable.

Lost or damaged SIM

- Block the SIM promptly by contacting support, so nobody else can use your number.
- Request a duplicate SIM at a SkyTel store with identity proof.
- A standard fee of ₹50 applies for a duplicate SIM.
- The old SIM stops working once the duplicate is activated.

Porting out to another operator

1. Send PORT followed by your number to 1900.

2 You receive a unique porting code by SMS.

3 Give the code to your new operator within its validity period.

4 Your number moves to the new operator once the port completes.

Porting in to SkyTel

To bring your number to SkyTel, send PORT to 1900 from your current operator's SIM, then visit a SkyTel store with the code and your identity documents.

eSIM

SkyTel supports eSIM on compatible phones. Complete identity verification at a SkyTel store, receive a QR code, and scan it in your phone's mobile network settings. Only one device can use the eSIM profile at a time.

Inactive numbers

Numbers inactive for 90 consecutive days may be suspended after notice. Recharge or contact support to restore eligibility.

Protecting yourself from SIM-swap fraud

- Never share OTPs or your SIM card details.
- If your phone suddenly loses signal for no reason, contact support at once.
- Visit only official SkyTel stores for duplicate SIMs.

Frequently asked questions

Q: How do I recharge my number?

A: Use the SkyTel app or website, dial *123#, or visit a SkyTel store or authorised retailer.

Q: How do I port my number out?

A: Send PORT followed by your number to 1900, receive a code, and give it to your new operator within its validity period.

Q: What if I lose my SIM?

A: Contact support to block it, then request a duplicate SIM at a store with identity proof.

Q: Does SkyTel support eSIM?

A: Yes, on compatible phones, after identity verification at a store.

Q: Can the online assistant deactivate my SIM?

A: No. Contact SkyTel support and complete identity verification.
